

DIPESH MARUTI NANGLE

DJANGO BACKEND DEVELOPER | DRF | FULL STACK | REST API

Mumbai, India | +91 7977983023 | dipnangle@gmail.com |
github.com/dipnangle | linkedin.com/in/dipesh-nangle-69419613a

PROFESSIONAL SUMMARY

Backend-focused full-stack developer with 3+ YEARS of professional experience building production REST APIs, virtualization platforms, and multi-tenant Self Hosted systems using Python, Django, Django REST Framework, PostgreSQL, Redis, and Celery. Independently architected and shipped a production CRM with 6-role RBAC, async notification pipelines, Kanban workflows, and S3-integrated storage. M.Sc. in Data Science completed while employed full-time. Track record of measurable impact: 40% downtime reduction, 35% API throughput improvement, and 60% reduction in manual lead assignment effort.

TECHNICAL SKILLS

Backend	Python, Django, Django REST Framework (DRF), Celery, Celery Beat, PHP
Frontend	React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, jQuery
Database & Cache	PostgreSQL, MySQL, MariaDB, Redis
Infrastructure	Linux Administration, NGINX, Gunicorn, KVM, Proxmox, Virtuoizzo, LVM, ZFS, Docker
Auth & Security	JWT, TOTP/2FA, RBAC, HMAC, Fernet AES Encryption, Session Management
Tools & DevOps	Git, GitHub, CI/CD Pipelines, AWS, GCP, Azure, Power BI, Tableau

WORK EXPERIENCE

Software Development Engineer Softaculous Ltd.	March / 2022 – Present Mumbai, India
- Architected REST APIs integrating KVM, Proxmox, and Virtuoizzo hypervisors, serving thousands of virtual machines across production customer environments. - Streamlined full VM lifecycle operations (LVM, ZFS, RAW, QCOW2), eliminating 4+ hours per week of manual deployment effort. - Designed a CPU threshold enforcement system enforcing configurable CPU usage caps per server, cutting overload-related downtime by 40%. - Configured NGINX and Gunicorn High Availability on Linux, achieving zero unplanned downtime over 12 months post-deployment. - Delivered 5 major full-stack UI modules using React.js, Tailwind CSS, Bootstrap, and jQuery integrated with DRF backends. - Optimized MySQL queries for high-volume production datasets, improving average API response times by 35% across key endpoints. - Built Power BI and Tableau dashboards for real-time health monitoring across 3 business units, adopted by leadership for daily operational decisions. - Wrote Python test scripts that accelerated critical bug identification by 30%, shortening release cycles.	
Software Development Engineer Softaculous Ltd.	October / 2021 – March / 2022 Mumbai, India
- Resolved 10+ front-end bugs, improving user experience and reducing reported issues across production releases. - Executed SQL queries for database maintenance and optimization; contributed to testing infrastructure leading to a full-time promotion within 6 months.	
Design Engineer Lithotech Food / Grade and Grind Technologies.	August / 2019 – September / 2021 Mumbai, India
- Produced 2D/3D product layouts using SolidWorks, AutoCAD, and CorelDraw for 10+ manufacturing projects, cutting revision cycles by 20%. - Self-taught Python and web development during this period, enabling a complete career transition into software engineering in October 2021.	

PROJECTS

CRM PLATFORM [\(crm.dipnangle.com\)](http://crm.dipnangle.com)

Django 4, Django REST Framework, React 18, PostgreSQL, Redis, Celery, Celery Beat, Tailwind CSS v4, FCM, VAPID Web Push

- Independently built and deployed a production multi-tenant CRM with 16 functional modules including Leads, Contacts, Deals pipeline, Tasks, Calendar, Team Board, and Reports.
- Implemented 6-role RBAC (ROOT, SUPERADMIN, ADMIN PLUS, ADMIN, RESELLER, END USER) with row-level queryset scoping across every API endpoint.
- Constructed dual-mode JWT authentication with HttpOnly cookies, JTI-scoped session revocation, replay attack prevention, and HMAC one-time impersonation tokens with 2-minute TTL.
- Developed a 3-tier async notification pipeline supporting 17 notification types via Celery, VAPID Web Push, FCM, and email fallback.
- Built a Lead Auto-Rotation engine using Round Robin and Weighted strategies, reducing manual lead assignment effort by 60%.
- Created a database backup system with S3, Google Drive, and local destinations with Fernet AES-128-CBC credential encryption.
- Integrated full 2FA (Email OTP and TOTP), progressive logout, audit log, and per-device session management.

Predictive Analytics – Air Quality and Health Impact [\(aerowell.dipnangle.com\)](http://aerowell.dipnangle.com)

Python, scikit-learn, XGBoost, Random Forest, REST APIs, Real-time Dashboards

- Trained XGBoost and Random Forest models predicting respiratory health risks from real-time air quality data, achieving 87% accuracy vs. 71% baseline.
- Developed live data ingestion pipelines processing 10,000+ data points daily with real-time visualization dashboards.

EDUCATION

Master of Science (Data Science) Mumbai University	2023 - 2025 CGPI 8.61/10
Bachelor of Engineering Mumbai University	2016 - 2019 CGPI 7.31/10
Diploma in Engineering Mumbai University	2013 - 2016 76.53 / 100 %

AWARDS & PUBLICATIONS

1st Place - VIT College Project Competition, February 2019 | CNC Plotter Machine
Published Paper - IJRAR, 2019 (IJRAR19J4171) | Multipurpose CNC Plotter Machine Using Microcontroller System
